---

**Full-Stack Developer** with 2+ years of experience building scalable web applications using Python, Django, JavaScript, and React.js. Proven track record in developing responsive user interfaces, optimizing database performance, and deploying applications on cloud platforms. Experienced in RESTful API development, version control with Git, and working with both SQL and NoSQL databases. Demonstrated ability to deliver high-quality solutions from concept to deployment.

## Experience

---

**Full-Stack Developer** (Digital Roomz, Kochi) 2025 – Present

- Develop and maintain web applications using Python, Django, and React.js in a remote work environment.
- Build responsive user interfaces with HTML, CSS, and SCSS, ensuring cross-browser compatibility.
- Creating and consuming RESTful APIs and managing efficient data storage and queries using PostgreSQL.
- Deploying and maintaining web applications through cPanel, handling file management, database setup, and domain configurations.
- Integrating UI components and improving design consistency to match brand requirements across different screen sizes.

**Full-Stack Developer** (Tortillon Technologies – Remote) October 2024 – April 2025

- Develop and maintain web applications using Python, Django, and React.js in a remote work environment.
- Build responsive user interfaces with HTML, CSS, and SCSS, ensuring cross-browser compatibility.
- Collaborate with team members using Git for version control and project management.
- Deploy and maintain applications using AWS cloud infrastructure.
- Troubleshoot technical issues and improve application performance by optimizing the code.

**Web Design and Development Intern** ( Internship Studio, Remote) June 2024 – September 2024

- Developed responsive web designs using HTML and SCSS, ensuring cross-device compatibility and a smooth user experience.
- Gained hands-on experience in web design fundamentals, improving skills in structuring HTML elements and styling them efficiently.
- Collaborated on UI/UX design, focusing on enhancing the user interface for intuitive and seamless navigation.
- Enhanced website styling with SCSS, leveraging advanced CSS features to create a visually appealing and structured layout.

**Full-Stack Developer Intern** ( Brototype, Kochi) February 2023 – March 2024

- Developed and maintained scalable web applications using Python and Django for backend development, improving project efficiency and maintainability.
- Designed and implemented responsive front-end interfaces using HTML, CSS, Bootstrap, SCSS, JavaScript, and React.js, ensuring user-friendly experiences across platforms.
- Built RESTful APIs and integrated third-party services, enhancing application functionality and enabling seamless communication between systems.
- Optimized database interactions using SQL (PostgreSQL) and NoSQL (MongoDB), improving query efficiency and data storage capabilities.
- Managed version control using Git, facilitating smooth collaboration and source code management.

- Continuously engaged in learning new technologies and staying updated with industry trends to improve skill set and application delivery.

## Projects

---

- Developed a form system for data collection using React, SCSS, and Bootstrap for the frontend, Django REST Framework for the backend, and PostgreSQL for data management. (GitHub)
- Designed and developed a feature-rich hotel website using Django, HTML, CSS, Bootstrap, and JavaScript, including booking, gallery, and service sections. Deployed through cPanel. (GitHub)
- Built a promotional website for a local food service using Django, HTML, CSS, Bootstrap, and JavaScript. Focused on highlighting menu items, customer testimonials, and contact functionality. (GitHub)
- Created a professional portfolio for a medical consultant using Django, HTML, CSS, Bootstrap, and JavaScript. Deployed the project via cPanel, ensuring a fully responsive and secure setup.
- Developed a responsive hotel website using Django, HTML, CSS, Bootstrap, and JavaScript. Implemented booking and contact features with a clean, user-friendly design. (GitHub)
- Built an interactive Insurance website using React.js for the frontend and Django REST Framework for the backend. Integrated PostgreSQL for data storage. (GitHub)
- Built a point-of-sale (POS) billing application with Django REST Framework backend and PostgreSQL database integration, collaborating with a team using Flutter for the frontend. Implemented secure transaction processing, inventory management, and reporting features. (GitHub)
- Ecommerce website using Python Django for the backend, HTML/CSS for the frontend, and PostgreSQL for database management. (GitHub)
- Developed a responsive fitness center website using React.js and SCSS, featuring membership management, and interactive workout tracking components with a modern, user-friendly interface (GitHub)
- Designed and built a website for Mind Zen IT Company using React.js and SCSS, delivering a professional and responsive user interface. (GitHub)
- Developed a website for a laundry business using React.js and SCSS, featuring an intuitive design and seamless user experience. (GitHub)
- Built a website for a temple using React.js and SCSS, incorporating a visually appealing and culturally relevant design. (GitHub)
- Built an interactive story creator web application using React.js for the frontend and Django REST Framework for the backend. Integrated PostgreSQL for data storage. (GitHub)
- Created an OLX-style classified ads platform using frontend as React.js and Firebase for backend services, including real-time database functionality and user authentication. (GitHub)
- Designed and developed a Netflix Clone using React.js and CSS, delivering a seamless and responsive user experience across multiple devices. (GitHub)
- Designed an elegant and responsive ecommerce website using HTML and CSS to ensure a smooth user experience across various devices. (GitHub)
- Built a Starbucks Clone with HTML and CSS, featuring a responsive design and smooth navigation for optimal user experience on desktops, tablets, and mobile devices. (GitHub)

## Technologies

---

**Languages:** Python, JavaScript, HTML5, CSS3, SCSS, SQL, JSON

**Frontend:** React.js, HTML5, CSS3, SCSS, Bootstrap, Tailwind CSS, Material-UI, Chart.js

**Backend :** Django, Django REST Framework, RESTful APIs - Databases: PostgreSQL, MongoDB, MySQL

**Tools & Platforms :** Git, GitHub, Postman, Figma, Swagger, AWS, Heroku, Netlify, Vercel
